Letter of recommendation for Mike Cornelia.

I have worked with Mike Cornelia for more than 15 years in my role with SUM/IT Systems and as a provider and developer of technology solutions for The School Box. I would highly recommend Mike for an IT position in any company looking for a person to lead as well as support their systems and technology growth.

During the time that I have worked with Mike, he has demonstrated exceptional technical and personnel leadership skills. He has a consummate understanding and vision of the role that technology plays in supporting corporate growth and efficiency.

Mike also possesses the unique ability to communicate effectively with the end users of the organization's technology based tools. He is able to provide them with a foundation from which they can maximize their own capabilities and productivity.

Additionally, Mike has a track record of effective and efficient management of strategic technology based projects. His experience and skills encompass the coordination of multiple disciplines and the involvement of participants from internal and external groups. He communicates project goals and objectives clearly to those involved. He assigns and manages accountability in a positive manner to the benefit of all involved.

Mike's drive to find and utilize technology and tools that enhance an organization's ability to address new opportunities coupled with his ability to help users get the most from the use of those tools will be an asset to any organization.

Sincerely,

Bruce Silveria
CEO, SUM/IT Systems
